Re: Response to Lab Loading Memo dated May 18, 2018

Date: June 11, 2018

---

The PVC is open to collaborating on solutions not only to reduce costs but to address fundamental pedagogical elements of lab loading.

If you are interested in returning to the PVC to discuss the recommendation posed by the PVC you are more than welcome to return on July 9, 2018, the PVC's next regular meeting.

Otherwise, if the EFC wishes to present to the Board of Trustees in July the current lab load proposal, the PVC cannot support the current proposal as it is cost prohibitive in this budget climate.

Please inform us of the direction the EFC wishes to pursue at your earliest convenience.
